BRACHT

Your getaway. Luxurious bathrooms redefined.

Luxury is the freedom to create a space that is connected to one's own senses and needs - a place for inner contemplation, regeneration, and revitalization.

Our individual solutions redefine this personal space and offer inspiration for modern, one-of-a-kind bathroom designs.

Alape[®]

Glazed Steel

All Alape basins and washstands are manufactured from glazed steel. This characteristic material for Alape opens up a fascinating variety of shapes, surfaces and dimensions with unique precision.

In addition, the closed, non-porous surface is absolutely hygienic, lacquerrepelling, non-discolouring and permanently corrosion protected, as well as scratch and wear resistant.

Shaping Surfaces

Shaping Surfaces stands for style-defining accents that touch all of our senses. The interplay between colour, texture and shape is at the heart of the curated collection.

Every surface is developed for specific basin geometries, every colour corresponds with the tactile material characteristics that are precisely determined in a complex process. Maximum competence in the individualised development of materials enables a holistic design approach that enhances bathrooms with multi-sensory experiences.

Dimension

Dimension translates big ideas into personal spatial concepts. The primary focus is on the vision. This is followed by architectural preparations that extend beyond standards and expectations. As a private refuge and a place of retreat and intimate rituals, the main bathroom is elevated to a creative space.

Accordingly, DIMENSION stands for the claim of always thinking ahead, expanding perspectives and making the extraordinary possible. No matter how expansive, expressive and exceptional – creative Possibilities are endless.

Classic

CLASSIC stands for the good things that remain. Alape's bucket sinks have proven their worth as robust functional products for garages, workshops, gardens or studios since the 1950s.

The characteristic edge protection and the high-drawn, integrated back splash influence its functional, timeless design.
