

## Parasols for Hotels & Restaurants

### Sun protection with brilliance

Glatz sees the outdoor area as an extension of interior design that enables planners to strengthen their customers' brand by extending it to the outside world.

The role of parasols has changed. They are no longer just practical shade providers, but stylish accent pieces that offer considerable added value through their aesthetics and convenience. [glatz.com](https://www.glatz.com)

*« We create spaces where  
people feel comfortable. »*

### Unbeatable quality and durability

Glatz parasols withstand the strains of everyday life. They are manufactured from the highest-quality materials and tested in the wind tunnel for stability up to 115 km/h, meaning they remain stable and reliable even in strong winds.

### Quick and easy handling

Every second counts, so safe and efficient operating processes are a must. Our parasols are quick and easy to operate, leaving more time for the important things. Our patented opening systems enable rapid opening and closing with just a few turns of the crank or using a tensioning lever.

### Variety that inspires

Whether round or rectangular, subtle or colourful – with over 70 fabric designs, different frame colours and a unique variety of sizes, you're sure find the right parasol for your architecture and environment. Every detail counts. The innovative LED lighting, the modern radiant heaters and the wide variety of rain gutters and side walls are impressive

### Tailor-made solutions

More shade means more tables and therefore more guests. If the outdoor area has dimensions that require customised products for optimal shading, Glatz plans and manufactures precisely fitting special formats from its range of giant parasols. Glatz is the partner that defies the impossible.

### Glatz – your expert partner

For years now, the Glatz project department has been committed to straightforward dialogue with national and international customers. They help architects, planners, interior designers, engineers, restaurateurs and hoteliers find their optimal shading solution.

Let's rethink your outdoor space together. We offer personal consultation which is customised, solution-oriented and considers every detail.
