

Press release – Designers Saturday 2021

## **Versatile applications, greater sustainability and a new colour**

Whether a new cabinet unit with swing door, a generously sized multi-purpose shelf or sophisticated accessories made from sustainable materials – all new products from String Furniture for 2021 have one thing in common: Their wide range of possibilities makes the String System even more flexible and functional. Other important additions are the String System for outdoor areas, which for the first time is freestanding, and a timeless, nature-inspired colour for the String Pocket.

## **The String Media Shelf**

String Furniture presents the Media shelf! A sophisticated solution for electronic devices with cables. The 50 cm-deep shelf provides space for your laptop, music system, loudspeaker, screen or charging station and blends harmoniously into the proven String System in the 58 cm wide version. Cables can be cleverly routed through the opening in the shelf, while the rear edge also secures the shelf and the delicate devices stored on it. The new depth also makes it possible to use the shelf as a small work surface.

## **Slim cabinet with swing door**

A smaller 58 cm wide cabinet has been added to the current cabinet range and it has a new function: a door that opens outwards. The swing door makes it simple to quickly stash things away, and offers completely new storage options for small spaces.

## **Sustainable accessories – not just for the kitchen**

Functional kitchen furniture with flexible storage solutions: String Furniture kitchen shelves are the perfect kitchen helpers. The secret to designing shelving solutions for a wide range of kitchen scenarios lies in clever accessories. And these are the new arrivals for 2021:

### **Plate rack**

Plate rack: the new rack saves space on the String shelf in small kitchens. Plates can be positioned as you prefer, sideways or facing forward. Alternatively, the versatile rack is also suitable for cutting boards or can be used to store records, magazines and drawing pads in the living room.

### **Renewable Bottle tray**

The new bottle tray keeps everything in place! The bottle tray is made of cork, a renewable raw material, and is precisely tailored to fit the metal shelves in the String System. It's designed to hold two bottles and is

available in a two-pack. The natural material gives the bottle tray a soft character and is obviously not just for bottles.

## **Cork underlay**

A new shelf insert is a practical kitchen aid! In addition to the bottle tray, String Furniture now also offers matching cork underlays for the metal inserts of the System. Perfectly matched to the shelves, they can accommodate hot pots and pans on the String shelves. The functional inserts can also be used as pot stands on the dining table.

## **Divider inserts**

Tailored to the shelf inserts, new cork dividers can split the shelf into handy compartments, for cutlery and other kitchen utensils.

Alternatively, the divider inserts can also provide a clear layout for the String System without cork underlays.

## **Sustainable Organizers**

The already well-known organizers are now available in a biocomposite material in the colours beige, grey and black. The 3-pack contains three different sizes of organizers, that you simply hang on the sides of the String System wall panels to keep small items organized and within easy reach.

## **Metal Outdoor String System now stands on its own feet**

Welcome to the great outdoors: with new galvanized posts and a rear wall, the String Outdoor now has a free-standing version for outdoor and indoor use.

The posts are almost one metre high, with adjustable feet, and makes the shelving system completely free-standing. It makes the weatherproof all-rounder accessible from both sides and provides a wide range of design options and functions for gardens and terraces. The rear panel is equipped with holes for hooks, where you can hang tools, flowerpots etc. For additional stability, the free-standing shelving system is fastened to the ground.

## **New year, new colour: The String Pocket in sage**

The smallest shelf in the range is famous for its colourful designs.

This year, the String Pocket comes in a soft, deep grey green, with powder-coated wall panels that gives them a matt finish. The timeless, classic colour matches the nuances of the rest of the range and makes it easy to combine multiple String Pocket shelves. The wall shelves doesn't only have to be combined vertically or diagonally – two string pockets can be combined to create a 1.80-metre horizontal shelf.
